# Use Case Specification: <Use-Case Name>

## 1. Use-Case Name

### 1.1 Brief Description

- One of the processes for the KHBPA is to provide money to those who have to have their horse euthanized. For the money to get to the right people they need to submit claims to the KHBPA. Processing claims can be complicated but if done online, can be simplified.

## 2. Flow of Events

### 2.1 Basic Flow

- User logs onto KHBPA website
- User clicks on 'Submit claim' tab
- User fills out information on form
- User clicks on 'Process claim' button
- Claim is sent to the KHBPA

### 2.2 Alternative Flows

#### 2.2.1 User doesn't fully fill out form before submitting it.

- Error message pops up saying that form needs to be filled out

#### 2.2.2 User enters information in the wrong box

- Error message pops up saying the information entered is wrong

## 3. Special Requirements

- None

## 4. Pre-conditions

- User must be a KHBPA member
- User must have an internet connection

## 5. Post-conditions

- Claim is sent to the KHBPA server
- User is sent back to the website
